"What is telepathic communication?

Very simply - *tele* refers to distance and *pathy* refers to feeling. So telepathic communication involves the ability to feel another across a distance. More than anything else, telepathy is a connection, a direct link to the soul of all beings. It's a mindful, yet "mind-less" understanding - a knowing of what the other is thinking, feeling, experiencing, so directly that one being almost becomes the other."

Penelope Smith, Animal Talk

Have you ever wondered:

What your dog was really thinking?
